1 PLANNING
Helping you answer the question, what exactly should I build?

2 DESIGN
Creating beautiful, easy-to-use interfaces that delight users and make your company look great.

3 DEVELOPMENT
Writing bullet-proof code that runs smoothly and securely across multiple platforms.

4 DEPLOYMENT
Getting your product to users—with minimum hassle.

5 MAINTENANCE
Keeping your product in top shape with block-of-time support contracts that let us respond quickly to your needs.

Visit our website to see products we’ve helped create.

Skill Set
Atomic’s designers and developers are generalists—mastering many languages, platforms, and practices.

This breadth make us a good fit for projects that cross multiple platforms. Imagining a wearable device that talks to a mobile app and stores data in the cloud? We can do that—all in house.

A few languages & tools we’re using

<table>
<thead>
<tr>
<th>Ruby on Rails</th>
<th>iOS</th>
<th>WPF</th>
</tr>
</thead>
<tbody>
<tr>
<td>.NET</td>
<td>Android</td>
<td>Objective-C</td>
</tr>
<tr>
<td>JavaScript</td>
<td>Java</td>
<td>C &amp; C++</td>
</tr>
</tbody>
</table>
Atomic Team
We have about 50 Atoms—designers, developers, testers, and operations—spread between our offices.

- 70% of Atoms have 5 or more years of experience
- 18% of Atoms have 15 or more years of experience
- 54% of Atoms are employee owners

Our Approach
Software projects are full of surprises, technical puzzles, and bursts of inspiration. Rather than planning every detail upfront, Atomic sketches out a broad plan and then gets creating.

We make a small piece, test it, discuss it, refine our plan, and then do the whole thing over again. This gives us the power to incorporate new ideas, adapt to change, and launch the best product possible.

Clients
Atomic works with a wide range of clients—from startups to Fortune 500 companies across many different industries.

- 120+ clients
- 200+ applications created

A few of our clients
- Gentex Corp.
- City of Grand Rapids
- Deluxe Corp.
- Brunswick Bowling
- Flow-Rite
- Steelcase
- John Deere
- Spectrum Health
History + Growth

Atomic Object was founded in 2001 on the belief that not all software is created equal. Many people can write code, but it takes a close-knit team of passionate people to create exceptional, innovative software products that change the way people do business.

Since that time, we’ve enjoyed stable, organic growth and a healthy backlog of projects. Carl Erickson, our co-founder and CEO, wants Atomic to be a 100-year-old software consultancy. We think we’re off to a pretty good start.

Our Values

Give a Shit
Think Long-Term
Own It
Share the Pain
Teach and Learn
Act Transparently
